

INNES

COUNT

Nm 2/50.000

COMPOSITION

- CUPRO (bemberg) 77%
- POLYAMIDE(NYLON) 23%

GAUGE

- 14G-1P

TYPE OF YARN

- STRAIGHT

COLOR STOCKS

- ALL COLOR STOCK SERVICE

DESCRIPTION

INNES combines Bemberg with stretch nylon with an air containing spinning technique.

Unique to regular Bemberg yarn, INNES has a tighter twist and lightweight touch.

In the last process of spinning, fiber is blown off to produce the least fibrous Bemberg yarn. By combining with stretch nylon, the yarn itself would have more elasticity and will knit resulting in an even dry touch.
