DESCRIPTION

NOBLE is an innovative wool created through a unique spinning technology.

It uses ultrafine 16.5 μ fibers, which provide a soft touch comparable to cashmere and offer excellent resistance to pilling.

Although it is made from 100 percent wool, the yarn has minimal fuzz.

This helps prevent itching even when perspiring and reduces the feeling of stuffiness, ensuring comfort throughout the year.

The structure of the yarn traps air, resulting in a fabric that feels exceptionally light.

Thanks to its shrink-resistant treatment, it is easy to care for and highly functional, making it suitable for a variety of uses including outdoor wear, sportswear, and everyday clothing.
