DESCRIPTION

Organic cotton with water repellent treatment. With this quality, water droplets will roll down from the surface of the knitted fabric. Proof PLUS Organic has an excellent quick-drying property due to its low water retention rate. As a unique water-resisting yarn for knit, it opens up new possibilities for knitting purposes.

*The water resistance will differ based on the knit structure of the fabric.

Stock service for ★mark products only

※Customized fluorine free water repellent yarn is also available. The fluorine free water repellent finishing is natural and eco-friendly.
