

## SPX COTTON

## COUNT

Nm 52.000

## COMPOSITION

- COTTON ORGANIC 51%
- POLYESTER(RECYCLED) 49%

## GAUGE

- 14G-2P
- 16G-1P
- 18G-1P

## TYPE OF YARN

- STRAIGHT

## COLOR STOCKS

- ALL COLOR STOCK SERVICE
- OWN COLOR MINIMUM:5KG

## DESCRIPTION

This is a high-gauge yarn that combines recycled polyester SPX, which has been specially processed with a unique stretch treatment from Japan, and compact-spun organic cotton for reduced fuzz.

SPX, through Japan's unique PIN false-twist stretch processing, achieves stretchability, loft, and lightness not found in traditional polyester. By combining SPX with cotton, it achieves a lightweight feel, bulkiness, and excellent stretchability, which is not present in regular cotton-polyester blends. The surface texture is very smooth, allowing for beautiful expression of both basic and intricate patterns. With its smooth texture, it is a highly versatile material that can be used across all seasons.

- Excellent Stretch

Despite being made of polyester, it offers stretchability competitive to polyurethane, allowing for a beautiful texture and clean pattern ex.

- Unconventional Bulkiness

In comparison to traditional polyester, this yarn has a remarkable volume. With fewer yarns, a sheer elegant fabric can be achieved.

- Outstanding Lightness

It is lightweight, even in heavier structures like Full needle or Milano ribs.

- Excellent Color Retention

By using compact-spun cotton with minimal fuzz, it offers excellent color retention and allows for a wide range of color expressions.
